

## Peer Assisted Study Sessions (PASS) Schedule - 2017/18 TERM 2

### KIN 191 - Anatomy & Physiology

PASS focuses on utilizing active learning techniques, which means you will be engaging with the course materials in a variety of different ways that promotes collaboration with your peers.

Sessions are designed to:

- Gain a more indepth understanding of the course content
- Meet students from your class in a small group setting
- Test your knowledge about your course prior to tests and exams
- Develop transferable study skills

Research has shown that the more PASS sessions students attend, the greater likelihood they are of improving their overall understanding of key concepts, resulting in the achievement of higher grades. We hope that we see out at one or more of our sessions each week!
