Course Outline: KIN 486
The previous course number for this course was KIN 489M.

Course Title: Advanced Seminar in Psychology of Movement

Course Instructor: Guy Faulkner, PhD
School of Kinesiology, University of British Columbia
Lower Mall Research Station, Room 337
2259 Lower Mall V6T 1Z4
Phone: 604 822 2990
Email: guy.faulkner@ubc.ca
Twitter: @GuyFaulkner
Web: kin.ubc.ca/pop-palab
Zoom office hours: Thursday 12 – 2 p.m.

Teaching Assistant: Matthew Fagan
Email: matthew.fagan@ubc.ca
Zoom office hours: Thursday 12 - 2 p.m.

Email Communication: For personal messages: use email and indicate “KIN 486” in the subject field. Response time to email or telephone inquiries is within 72 hours (weekends excluded).

Course Timetable
Class Schedule: Tuesdays 2-3.30 p.m. (usually asynchronous – except September 8; Nov 24; Dec 1) and Thursdays: 2 pm to 3pm (drop-in).

Description: The links between physical inactivity and public health are well documented. This module is designed to give students an opportunity for advanced analysis of the field of exercise psychology. The module aims to develop a critical understanding of how physical activity is assessed, and what are the determinants of physical activity. Using various theoretical frameworks the influence of psychological factors will be examined, across different settings and populations, with a particular focus on interventions aimed at enhancing mental health. The module also aims to develop student’s understanding of how psychology can be used to design effective interventions at the individual and community level. This course will provide a foundation in exercise psychology for graduate study.

Subject-specific outcomes:
1. Develop an understanding of ecological frameworks used to assess, design and evaluate health promotion interventions.

2. Development of practical skills in formulating, applying, and evaluating psychological theory-based interventions to promote physical activity.

Core-academic outcomes:
3. Ability to critically evaluate the processes of designing and evaluating physical activity interventions in the context of public health policy.
4. Ability to evaluate and apply knowledge of a range of different theoretical perspectives and concepts relating to interventions to promote physical activity.

**Personal/transferable outcomes:**
5. Work in small groups to solve problems
6. Demonstrate an ability to link theory to practice.

**Teaching/Learning Methods:**
Lectures/Group Work/Independent Study. Tuesday lectures will provide students with an overview of the core topics in this course. Lectures are used to present an overview of key information. These will be recorded online and can be viewed during the set class time or at any time during the week (see course outline). Thursday sessions will be optional and provide an opportunity for discussion of the material and its application. Independent study will be required in terms of reading in preparation for each lecture and completing course assignments. For these experiences students will be set a task to guide their independent learning, such as a topic or problem related to set reading or lecture material. A group project will also provide the opportunity for more in-depth investigation of key issues drawn from the lectures. Skills such as criticizing, analysis, problem solving and decision making are developed.

You will be working throughout the course in a group of 4 students. You can form your own groups or I will assign you to a group on September 17th. You will meet independently every two weeks to review articles as part of the reading scheme, and will also be working together on the group project. As a group you will be responsible for coordinating meetings and completing group tasks. It is expected that you will be available to meet with your group at the very least between 2 and 3.30 on Tuesdays, or 2-3.30 Thursdays if you do not plan on joining the drop-in class. That is, there is no excuse for not being able to find a time that everyone in your group can meet.

Sunday nights: I will release a short video on canvas summarizing the key objectives of the coming week and highlight what needs to be done.

**Tuesday September 8th:**

2. Group Task: Develop an exercise intervention for students seeking help for depression  
60%  
Dec 10th

3. Examination  
a) abstract  
20%  
Exam period

Assessments

1. Reading synopsis (20%) 
This will include five one-page (300 word) synopses of current research articles plus critical commentary. Marks are given for successful completion within the established guidelines (2% for each synopsis and 2% for completion of group summary; to be posted on canvas). This assessment task will enable students to evaluate differing views based on required reading and information from a variety of sources, and to disseminate and critically appraise research evidence.

2. Group Project (60%) 
A problem-based learning exercise will provide an opportunity to collaborate on a project. The objective of this assignment is to integrate components of the course in terms of physical activity assessment, applying theory to practice, and planning and evaluation of interventions. The class has been asked to develop an evidence-based exercise intervention for students seeking help for depression in collaboration with UBC counselling services, and to develop an evaluation plan. In groups of 4-5 we will tackle this challenge. The general outline for the final assignment should be:

- Synthesis of evidence for exercise as a treatment for depression
- Rationale for the intervention (including theoretical basis and logic model); and a cool acronym.
- A description of the intervention including discussion of
  - Content – what is the intervention aiming to deliver, and how?
  - Delivery method
  - Deliverer – who will deliver the intervention?
- Methods for evaluating the key outcomes, behaviours, and mediators of behavior change
- Outline of assessment of intervention implementation.

A final group paper will be produced (maximum of 3000 words excluding references/appendices). Each group(s) will provide a brief oral presentation of the intervention in class.

Opportunities will be provided weekly on Thursdays to discuss the project while course content and readings will be geared to support its development. The group will be responsible for identifying roles and responsibilities of each group member.

Assessment includes two components. First, 80% of the final grade is based on the final report. Everyone shares the same grade based on the report assessment. The final 20% will consist of 10% based on self-assessment of personal contribution to the group
project, and 10% based on average peer assessment. The self and peer assessment form is in Appendix 1.

3. Final exam – article synopsis (20%)
The final examination (1 hour) will be scheduled during the exam period and is worth 20% of the final grade. You will be required to write a 300 word synopsis of a short article and identify four concerns with the presented article. A portion of the course structure consists of a student directed learning component requiring students to organise their own learning enabling them to address this section. Specifically, the synopsis tasks prepare you for this examination.

The final exam will be held during the official examination period and will be 1 hour long. Alternative exam dates will only be provided for students experiencing medical or serious family emergencies (and only where medical documentation is provided). Do not make travel arrangements for the holiday period until you know your exam schedule!

Academic Dishonesty and Plagiarism
Plagiarism, cheating or any other form of academic dishonesty will not be tolerated. This especially means that individual assignments must be completed individually. Violations will be taken seriously and will be dealt with according to the University policy regarding academic dishonesty (See Academic Calendar, http://www.students.ubc.ca/calendar/). Any transgression could result in failure of the course. It is your responsibility to become familiar with the University of British Columbia’s Academic Honesty and Plagiarism Policies, as well as the Student Declaration and the consequences of violating these policies.

For group projects, all contributors have joint ownership of the work, and therefore intellectual property rights. Along with joint ownership comes joint responsibility. If group work contains material which has been plagiarised all members of the group will be deemed responsible and will be liable for the same penalty.

Required and Recommended Reading
There is no course textbook. However, there are a range of recommended texts that would be helpful for this course and for graduate studies related to health promotion and exercise psychology. There is also a range of core readings supporting each session - Students are expected to study the readings each week. Further independent reading will be required as directed by the reading group scheme and the intervention assignment. Support will be available throughout the course in terms of individual and group tutorials, and appointments can also be booked on an individual basis. Lecture slides and some additional materials will be posted on canvas.

Week 11:
University Policies
UBC provides resources to support student learning and to maintain healthy lifestyles but recognizes that sometimes crises arise and so there are additional resources to access including those for survivors of sexual violence. UBC values respect for the person and ideas of all members of the academic community. Harassment and discrimination are not tolerated nor is suppression of academic freedom. UBC provides appropriate accommodation for students with disabilities and for religious observances. UBC values academic honesty and students are expected to acknowledge the ideas generated by others and to uphold the highest academic standards in all of their actions. Details of the policies and how to access support are available on the UBC Senate website.

Students Learning Outside of Canada
During this pandemic, the shift to online learning has greatly altered teaching and studying at UBC, including changes to health and safety considerations. Keep in mind that some UBC courses might cover topics that are censored or considered illegal by non-Canadian governments. This may include, but is not limited to, human rights, representative government, defamation, obscenity, gender or sexuality, and historical or current geopolitical controversies. If you are a student living abroad, you will be subject to the laws of your local jurisdiction, and your local authorities might limit your access to course material or take punitive action against you. UBC is strongly committed to academic freedom, but has no control over foreign authorities (please visit http://www.calendar.ubc.ca/vancouver/index.cfm?tree=3,33,86,0 for an articulation of the values of the University conveyed in the Senate Statement on Academic Freedom). Thus, we recognize that students will have legitimate reason to exercise caution in studying certain subjects. If you have concerns regarding your personal situation, consider postponing taking a course with manifest risks, until you are back on campus or reach out to your academic advisor to find substitute courses. For further information and support, please visit: https://academic.ubc.ca/supportresources/freedom-expression.

Inclusivity
Education is a multidisciplinary field that brings together faculty, students and others from diverse academic and personal backgrounds. UBC’s Faculty of Education is committed to creating a respectful workplace and learning environment that supports inclusion based on the principles of equity, diversity and social justice in order to create an environment that supports its community members’ full participation. The Faculty of Education is committed to providing accessible, usable, and welcoming spaces for faculty, staff, students, and visitors who have disabilities, are members of racialized communities, Indigenous, transgender, two-spirit and gender-diverse people, regardless of their age, sexual orientation, social status, religion, ethno-linguistic, nationality and/or citizenship status.

Faculty of Education courses take place in learning environments that are inclusive of gender identity, gender expression, sex, race, ethnicity, class, sexual orientation, ability, age, etc. Learners and educators expect to be treated respectfully at all times and in all interactions. Non-sexist, non-racist, non-homophobic, non-transphobic and non-heterosexist language is expected in Faculty of Education classes, course content, discussions and assignments.
Please feel welcome to e-mail your instructor your name and pronoun and how you would like these to be used.

Academic Integrity

All UBC students are expected to behave as honest and responsible members of an academic community. Breach of those expectations or failure to follow the appropriate policies, principles, rules, and guidelines of the University with respect to academic honesty may result in disciplinary action. It is your responsibility to become familiar with the University of British Columbia’s Academic Honesty and Plagiarism Policies, as well as the Student Declaration and the consequences of violating these policies.

Students are responsible for submitting original work and accurately citing (referencing) the work of others within assignments. All submitted assignments become the property of the University of British Columbia and electronic copies of submitted assignments will be stored and used to check against future, present, or past cases of academic misconduct. Students will also be required to submit a copy of all of their assignments to TurnItIn.com.

Please note the following dates:
Term Dates: Tuesday September 8th to December 3rd, 2020
Last date for withdrawal without a W on your transcript: September 21, 2020
Last date for withdrawal with a W standing on your transcript: September 22 – October 30, 2020
Exam dates (do not book travel until the date of the final exam is confirmed): Dec 7th to December 22nd, 2020

Policy on text-matching software
UBC subscribes to Turnitin, an online system that compares written material with the Web and with other material submitted to its database. Faculty, staff and students can upload submissions and check for duplication of material in other sources and possible plagiarism.

Learning Analytics
Learning analytics includes the collection and analysis of data about learners to improve teaching and learning. This course will be using the following learning technologies: Canvas. Many of these tools capture data about your activity and provide information that can be used to improve the quality of teaching and learning. In this course, I plan to use analytics data to:
- View overall class progress
- Review statistics on course content being accessed to support improvements in the course

Copyright
All materials of this course (course handouts, lecture slides, assessments, course readings, instructor recorded videos etc.) are the intellectual property of the Course Instructor or licensed to be used in this course by the copyright owner. Redistribution of these materials by any means without permission of the copyright holder(s) constitutes a breach of copyright and may lead to academic discipline. Students are not permitted to record classes or take photographs during class unless they are granted prior permission from the instructor.

Academic Accommodation for Students with Disabilities
The University’s goal is to ensure fair and consistent treatment of all students, including students with a disability, in accordance with their distinct needs and in a manner consistent with academic principles. Students with a disability who wish to have an academic accommodation should contact Access and Diversity without delay.

Course Review
We are continually trying to improve our teaching, and student opinion is an important factor which influences this. At the end of the course every student should fill in a questionnaire. This involves a set of predetermined questions to grade all aspects of the course, as well as the opportunity to add any written comments. Make sure you do this if you want your opinion to be considered.
READING SCHEME STUDY GUIDE

**What I must do?**

Every two weeks, I must read ONE article and write a ONE page synopsis.

**What’s in it for me?**

Working in a reading group . . . .

- Will allow me to cover a larger range of material
- Will give me the opportunity to critically examine research with my colleagues
- Will give me a one page synopsis of four articles every two weeks which will help me prepare for the exam

**SETTING UP**

1) Form into groups of 4. Give yourself a name and elect a team leader. The team leader must email me (guy.faulkner@ubc.ca) with the names of those in the group and a group name by September 17th. Groups will be confirmed on this date based on numbers enrolled in the course.

2) A week before the designated sessions are due to meet in class time you will meet as a group to coordinate which reading each person will do (other than the identified core reading) from the list of four articles in each topic. Each person then conducts a critical reading of their chosen article and writes a 1-page synopsis. The articles are available through the electronic collections of the library.

3) This synopsis, with your name on it, and the name of your group, must be posted (in RTF format) on canvas the day before the identified drop-in session (for example, you must post your first synopsis on September 23rd) and your group response to set questions the day after (September 25th in the first example). This will allow for monitoring. Additionally, you will be able to access the synopses of your colleagues. Failure to post a completed synopsis when required will result in a 2% reduction from your final grade. Further information will be provided in class about this process.

4) Your group will coordinate a meeting to review the synopses and answer 4 set questions. You will share your key interpretations of each reading and discuss any issues that were raised.

5) Focus questions will be provided that you must answer as a group based on the readings. Thursday drop-sessions will provide further opportunities for discussion of the focus questions, and potential implications for the group project.

**Writing a Synopsis**

It is difficult to lay down any specific structure to help you develop your notes or a 1-page/300 word synopsis of each paper you read. If you have a personal preference already, stick with that, otherwise, consider some of the following ideas. First, to work as a group, each person must develop a synopsis that is of the quality you would personally want to receive from your colleagues, and that would personally help you in the exam. As such, you need to:
WRITE YOUR NAME and GROUP NAME

Clearly identify the author (date) and all publishing details as used in the course outline

1. Introduction (why?)
   a) what are the authors trying to settle, prove or demolish? What are they asking?
   b) How did this issue come up?
   c) Why bother in the first place – SO WHAT?

2. Materials and methods (how?)
   a) what was assessed
   b) how did they do this?

3. Results (what?)
   a) briefly summarise key results

4. Discussion (general)
   a) what is discussed? (what theoretical and/or applied implications are derived,
      what limitations are noted, what recommendations are made for future
      research?)

FINALLY:
Separate from your synopsis, try to identify and list a few criticisms you may have of the research undertaken. What might have you done differently?

FEEDBACK SUGGESTION:
Don’t read the abstract at first! Write your synopsis and compare it with the original abstract of the paper. Your synopsis will be slightly different in that the focus is on being critical of the paper but the original abstract will give you feedback as to whether you are picking up the important elements of the study. This will help prepare you for the exam.
TOPICS AND READINGS

**Topic 1 – Physical and Depression – Setting the Scene**

**Topic 2 – Preferences and Barriers to exercise**

**Topic 3 – Exercise Interventions 1**

**Topic 4 – Exercise Interventions 2**
