Course Syllabus

KIN 438: Muscle Physiology: From Generation to Regeneration
(Term II, 2021W)

3 Credits

UBC’s Vancouver Campus is located on the traditional, ancestral, and unceded territory of the
xwməθkwəy̓əm (Musqueam) people. The land it is situated on has always been a place of
learning for the Musqueam people, who for millennia have passed on in their culture, history, and
traditions from one generation to the next on this site.

Course Structure: Online/ Friedman Building 153 M/W/F 2:00-3:00pm

Your Instructor: Dr. Cameron Mitchell

Previous course code: Kin 462

Contact Information: cameron.mitchell@ubc.ca (mailto:cameron.mitchell@ubc.ca). Email if question
relates to only to you. Please use the discussion forums for questions about course material. More
focused questions will be answered directly in the online discussion forms while broader more open
ended questions will be answered in class.

Response time: I aim to respond to emails/ discussion posts within 24 hours but will not respond on
evenings or weekends. Response times may be slower in the days immediately before the midterm and
final exam due to last minute questions so please ask questions early!

You can navigate to specific sections of the syllabus using these links.

Course Description | Course Assignments | Course Schedule

Instructor Bio

Dr. Cameron Mitchell Ph.D., School of Kinesiology

https://canvas.ubc.ca/courses/84796/assignments/syllabus
Dr. Mitchell has been an Assistant Professor in the school of Kinesiology since 2019, his research focuses on how and why we lose muscle mass as we age and what we can do about it. His lab uses techniques which range from resistance exercise and nutrition interventions to molecular biology techniques. He is a former rugby player who enjoys being active in the mountains and cycle commuting to work.

**Course Description**

This course will explore the cellular and molecular response of human muscle to exercise aging and inactivity. Muscle cells sense a number of contraction related events which control the transcription of genes and protein translation resulting in altered muscle phenotype. In addition to muscle fibers, muscle tissue contains a number of other cell types including stem cells, endothelial cells and fibrotic cells which work together to allow muscle to adapt to stimuli such as exercise training. In this course you will lean about the similar and divergent adaptions to muscle injury, aerobic training, resistance training, old age and inactivity. We will also addressed some possible explanations for interindividual variability in response to exercise training. You will also have the opportunity to practice criticality reading and evacuating recent primarily literature as well as claims made by so called 'experts' on the internet.

**High Level Learning Objectives:**

- Understand the similarities and differences in the muscular response to different exercise modes
- Contrast muscular responses to aging and inactivity
- Discuss the relationship between exercise and inactivity/ aging, are they opposites?
- Critically evaluate recent literature and discuss its practical applications
- Use evidence to respond to media claims related to muscle

**Specific Learning Objectives:**

- Identify the different cell types within muscle and their functions
- Explain how aerobic and resistance exercise initiate different signaling events
• Apply basic molecular biology to understanding exercise adaptation
• Understand the regulations of mitochondrial biogenesis
• Understand the role of angiogenesis in exercise adaptation
• Explain the role of satellite cells in human muscle
• Explain the relationship between ribosomes, translational capacity and exercise adaption
• Understand how protein turnover regulates muscle size
• Discuss possible mechanisms which allow for extreme levels of muscle hypertrophy
• Identify common age related changes in muscle as well as the response to exercise
• Explain the negative effects of inactivity on muscle function and metabolism

Additional Materials

Online Communications

In this course, and throughout your program, you are expected to communicate in a respectful and professional manner. You may find it helpful to review UBC’s Distance Learning Communication Online: Netiquette (https://distancelearning.ubc.ca/learner-support/communicating-online-netiquette/) web page.

Web Conferencing

Zoom

Your class may be meeting virtually using Zoom, at least at the beginning of the semester. Some class sessions may be recorded and posted for you to view. Before recording you will have the option to off your video and/or mute your audio, change your name if you wish not to be in the recording. The recordings will be shared with you in this course.

Review the Zoom Student Guide. (https://keepeteaching.ubc.ca/files/2020/04/zoom-student-guide.pdf) If you are experiencing technical issues then contact the UBC IT help desk for support (https://it.ubc.ca/got-question-about-it-products-and-support#helpdesk)

Course Assignments

This is an overview of the assignments for this course. For more information about each of these assignments, use the ASSIGNMENTS link in the course navigation to read the details and expectations for each assignment.
<table>
<thead>
<tr>
<th>Module quizzes X 4 (lowest mark is dropped)</th>
<th>30 %</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Journal club presentation</strong></td>
<td>15 %</td>
</tr>
<tr>
<td><strong>Video Response assignment</strong></td>
<td>15 %</td>
</tr>
<tr>
<td>Final exam</td>
<td>40 %</td>
</tr>
</tbody>
</table>

Course Schedule

The course will be divided into 6 modules, with a quiz the Wednesday after modules 2-5 during class time (2-3pm PST).

Each Monday there will be a live question and answer session during class time (2-3pm PST).

Each Friday during class time (2-3pm PST) starting January 21 there will be a Journal Club presentation which may be over Zoom where students will discuss a recent article relevant to course material. The content testable on module quizzes. The Journal Club presentations will be recorded for students to watch asynchronously if they cannot join live. If you do not want you presentation recorded inform Dr. Mitchell in advance.

Modules and Dates

<table>
<thead>
<tr>
<th>Module</th>
<th>Notable Dates</th>
</tr>
</thead>
</table>
| MODULE 1: Introduction/ Muscle Regeneration  
*January 10-21* | • Practice quiz |
| MODULE 2: Adaptation to Aerobic Exercise  
*January 24-February 4th* | • Quiz Feb 9th |
| MODULE 3: Adaptation to Resistance Exercise  
*February 7-18* | • Quiz March 2nd |
| MODULE 4: Responders and Non-Responders to Exercise *February 28- March 11* | • Quiz March 16th |
| MODULE 5: Aging Muscle  
*March 14-25* | • Quiz March 30  
| | • **Video Response assignment due March 26** |
Module 6: Adaptions to Inactivity
March 28- April 8

University Policies

UBC provides resources to support student learning and to maintain healthy lifestyles but recognizes that sometimes crises arise and so there are additional resources to access including those for survivors of sexual violence. UBC values respect for the person and ideas of all members of the academic community. Harassment and discrimination are not tolerated nor is suppression of academic freedom. UBC provides appropriate accommodation for students with disabilities and for religious and cultural observances. UBC values academic honesty and students are expected to acknowledge the ideas generated by others and to uphold the highest academic standards in all of their actions. Details of the policies and how to access support are available from the UBC Senate Website. (https://senate.ubc.ca/policies-resources-support-student-success)

Online Learning for International Students

During this pandemic, the shift to online learning has greatly altered teaching and studying at UBC, including changes to health and safety considerations. Keep in mind that some UBC courses might cover topics that are censored or considered illegal by non-Canadian governments. This may include, but is not limited to, human rights, representative government, defamation, obscenity, gender or sexuality, and historical or current geopolitical controversies. If you are a student living abroad, you will be subject to the laws of your local jurisdiction, and your local authorities might limit your access to course material or take punitive action against you. UBC is strongly committed to academic freedom, but has no control over foreign authorities (please visit the UBC Academic Calendar 2020/21 (http://www.calendar.ubc.ca/vancouver/index.cfm?tree=3,33,86,0%20) for an articulation of the values of the University conveyed in the Senate Statement on Academic Freedom (http://www.calendar.ubc.ca/vancouver/print.cfm?tree=3,33,86,0)). Thus, we recognize that students will have legitimate reason to exercise caution in studying certain subjects. If you have concerns regarding your personal situation, consider postponing taking a course with manifest risks, until you are back on campus or reach out to your academic advisor to find substitute courses.

Course Policies

Please make sure you are familiar with the academic policies and procedures.

Academic Integrity

Students are expected to follow UBC policies for academic integrity and academic misconduct, which includes practices around plagiarism, referencing and citation, and copyright. For more see, UBC's
Learning Commons Academic Integrity resources (https://learningcommons.ubc.ca/academic-integrity).

Accessibility

If you have any challenges accessing materials that will impact your success in this course, UBC’s Centre for Accessibility can support your needs by providing appropriate accommodations to support you.

- Web: UBC’s Centre for Accessibility website (https://students.ubc.ca/about-student-services/centre-for-accessibility)
- Email: accessibility@ubc.ca (mailto:accessibility@ubc.ca)

Learning Analytics

Some of the learning technologies used for this course collect data to support the improvement of teaching and learning. This includes the collection of data related to overall class progress to provide personalized feedback, engagement in discussion forums to support the fostering of community within the course, and how resources are being accessed to support improvements to the course design. To learn more about learning analytics at the Faculty of Education and at UBC, see the What is Learning Analytics? (https://ets.educ.ubc.ca/learning-analytics/students/) page.

Reading List

MODULE 1: Introduction/ Muscle Regeneration

January 4-15

MODULE 2: Adaption to Aerobic Exercise

MODULE 3: Adaptation to Resistance Exercise

**MODULE 4: Responders and Non-Responders to Exercise**

**MODULE 5: Aging Muscle**

**MODULE 6: Adaptions to Inactivity**
