Kinesiology KIN 235 Section 921  
(Formerly KIN 275)  
Summer 2023

Instructor: Viviana Shiffman  
E-mail: Viviana.shiffman@ubc.ca  
TA: Owen Payne  
TA e-mail: Owen.payne@ubc.ca  
Class: Tuesday & Thursday 5-8pm

**Acknowledgment**
UBC’s Point Grey Campus is located on the traditional, ancestral, and unceded territory of the xwməθkwəy̓əm (Musqueam) people. The land it is situated on has always been a place of learning for the Musqueam people, who for millennia have passed on their culture, history, and traditions from one generation to the next on this site.

**Introduction:**
This course will provide an introduction to how the muscular, ventilatory and cardiovascular systems respond to acute and chronic exercise. The goal of the course will be to link together different learning modules so that you gain an understand of how the human body respond to acute exercise and how we adapt to exercise training.

**Prerequisites:**
Bachelor of Kinesiology, second year standing.

**Resources**
- Lecture and Lab Material – All will be available to you on Canvas

**Format of the Course**
**Tuesdays (5-8pm)**  
- 45-50 minute of live, lectures (Separated by 10-15 minute breaks)

**Thursdays (5-8pm)**  
- Lab materials will be posted prior to lab. It is your responsibility to read all procedures before the start of class.

**Evaluation of the Course**
- **Labs:** 20% (5% for each lab). Completed individually – Submissions will require you to analyze your collected data and answer discussion questions. In order to be eligible to submit labs you must attend the lab.
- **Midterm:** 30% The Midterm will cover the first three modules and first two labs.  
  - If you are unable to attend the midterm for a legitimate reason, the weight from the midterm will be added to the final exam. Please see Kinesiology in-term academic concession policy: https://kin.educ.ubc.ca/undergraduate/bkin/academic-concession/  
  - There will be no makeup midterms.
- **Workbook and class attendance:** 5% The workbook will be completed throughout class time.
- **Final Exam:** 45% Content from throughout the whole course, guest lecture and labs will be on the final.
Course Overview:
Module 1: Introduction and Energy transfer
Module 2: Metabolism
Module 3: Ventilation
Module 4: Cardiovascular Regulation
Module 5: Muscle Function
Module 6: Exercise training

University Policies
UBC provides resources to support student learning and to maintain healthy lifestyles but recognizes that sometimes crises arise and so there are additional resources to access including those for survivors of sexual violence. UBC values respect for the person and ideas of all members of the academic community. Harassment and discrimination are not tolerated nor is suppression of academic freedom. UBC provides appropriate accommodation for students with disabilities and for religious observances. UBC values academic honesty and students are expected to acknowledge the ideas generated by others and to uphold the highest academic standards in all of their actions. Details of the policies and how to access support are available on the UBC Senate website: https://senate.ubc.ca/policies-resources-support-student-success/

Course Policies
Please make sure you are familiar with the academic policies and procedures.

Academic Integrity
Students are expected to follow UBC policies for academic integrity and academic misconduct, which includes practices around plagiarism, referencing and citation, and copyright. For more see, UBC’s Learning Commons Academic Integrity resources: https://learningcommons.ubc.ca/academic-integrity/

Accessibility
If you have any challenges accessing materials that will impact your success in this course, UBC’s Centre for Accessibility can support your needs by providing appropriate accommodations to support you.

• Web: UBC’s Centre for Accessibility website: https://students.ubc.ca/about-student-services/centre-for-accessibility
• Email: accessibility@ubc.ca

Learning Analytics
Some of the learning technologies used for this course collect data to support the improvement of teaching and learning. This includes the collection of data related to overall class progress to provide personalized feedback, engagement in discussion forums to support the fostering of community within the course, and how resources are being accessed to support improvements to the course design. To learn more about learning analytics at the Faculty of Education and at UBC, see the What is Learning Analytics? (https://ets.educ.ubc.ca/learning-analytics/students/)
