Course Description

We will analyze how to teach and coach sports games that involve the use of activities to stimulate and motivate cognitive and physical learning. We will examine the evolution of team game instruction and differences between skill-based and tactical-based approaches through literature review and practical discussion. We will learn how to design activities that are creative, innovative, challenging, and developmentally appropriate. As well, we will practice leadership skills especially in the area of sports games teaching and coaching. It is expected that all students will demonstrate a commitment to the objectives of the course by following the course policies and requirements. Furthermore, students are expected to adhere to the principles of equity, inclusion, and integrity throughout the duration of the course.

Instructor Bio

I am a practitioner in the field of sports and recreation delivery. I was an elite athlete and represented Canada on the international stage in Swimming. After my swimming career, I have had many different employment opportunities in the delivery of leisure opportunities. One of those opportunities included working for the Vancouver Park Board for over 47 years. During this time, I provided sport and recreation opportunities for diverse populations. As well, I have been teaching at UBC as a School of Kinesiology sessional instructor for 28 years. I take my expertise and translate it into active class delivery that includes theory, research, and experiential learning.

Learning Material

There is not a required textbook for the course, however, there will be a series of references on the course outline; https://canvas.ubc.ca. Students will be responsible for having access to these notes.

Learning Outcomes

As an *instructor*, I will be responsible for integrating instructional strategies that support collaborative and active learning and accommodate students' different learning styles, as a *student* you will be responsible for developing new knowledge by engaging in critical dialogue and self-directed inquiry with your classmates: *together*, we will both be responsible for ensuring respectful, engaging, inclusive, effective, and productive learning environment.

At the end of the course students will be able to:

- 1. Apply the philosophy, principles, and methods used in a variety of conceptually based approach to teaching and coaching team games.
- 2. Plan to teach both technical and tactical skills by using the teaching games for understanding approach.
- 3. Design team "games with aims' that are fun, inclusive, developmentally appropriate, safe, and active.
- 4. Practice being professional, respectful, and cooperate in a team environment.

Learning Activities

The course will have three main learning platforms. The first, will be self-directed learning, where students will read reference material and answer questions. The second, will be lecture presentation platform. The third, will student lead discussion and presentation of relevant material. The material will be reviewed and documented by students.
